

Course Title: Introduction to Online and Hybrid Course Development and Delivery

Course Credit: 3

Course Description:

Introduction to Online and Hybrid Course Development and Delivery is a course in which participants become online students and gain insight into the enjoyment, challenges and demands of being a virtual student. Throughout the course, participants identify strategies for building an online or hybrid learning community. Based on the iNacol Standards for online teaching, participants will experience the range of learning options that support interaction, collaboration, and social presence. This course fulfills the professional development for teaching online courses in the state of Wisconsin.

Student Learning Objectives - Participants will:

- demonstrate the prerequisite technology skills to teach online.
- plan, design and incorporate strategies to encourage active learning, interaction, participation and collaboration in the online environment.
- demonstrate online leadership in a manner that promotes student success through regular feedback, prompt response and clear expectations.
- model, guide and encourage legal, ethical, safe and healthy behavior related to technology use.
- understand and develop strategies to respond to students with special needs in the online classroom.
- experience online learning from the perspective of a student.
- demonstrate competencies in creating and implementing assessments in online learning environments in ways that assure validity and reliability of instruments and procedures.
- develop and deliver assessments, projects, and assignments that meet standards-based learning goals and assess learning progress by measuring student achievement of learning goals.
- demonstrate competencies in using data and findings from assessments and other data sources to modify instructional methods and content and to guide student learning.

- demonstrate frequent and effective strategies that enable both teacher and students to complete self- and pre-assessments.
- collaborate with colleagues.
- arrange media and content to help students and teachers transfer knowledge most effectively in the online environment.
